**CCC SEEKS AREA YOUTH FOR NAPA CREW**

Young people wanting to build hiking trails or grow plants for California cities and parks should consider a year with the California Conservation Corps in Napa.

The CCC's Napa Satellite is hiring young men and women between the ages of 18 and 23 for its local nonresidential crew. Corpsmembers will be involved with environmental work in Napa, Sonoma and Marin counties.

Some of the local work includes constructing trails in area state parks, learning about horticulture and nursery management at the Corps' Napa Native Plant Nursery and assisting with the Napa River Project, where the CCC crew will focus on stream bank stabilization, exotic plant removal and revegetation. Corpsmembers may also be dispatched to fires and floods as part of the CCC's emergency response activities.

While in the Corps, corpsmembers spend part of their week advancing their education, whether through high school diploma or GED instruction, English as a Second Language classes, or college courses. Corpsmembers earn approximately \$1140 per month, with an opportunity to earn up to \$4,725 in scholarship money after one year for academic or vocational schools.

The Napa crew meets at the CCC's Napa office each weekday morning. For more information on joining the CCC's Napa crew, call the Corps' Napa office at (707) 253-7783. General information on the Corps and its programs is available on the CCC's Web site at www.ccc.ca.gov.
